Subject: FMC superfund site at Pocatello

Kevin, I don't know if you're still the remedial project manager for the FMC cleanup project in Power County, Idaho. But I need a comment from the EPA about any possible impact the announced split of FMC into two separate companies will have on the project in Southeast Idaho. I suspect it has none, but remediation work at the site is slated to begin this spring or summer. You can email comments or call me at 208-239-3128. Thanks.
